SPRING IS UPON US - Message from Prof Elain Vlok

The season of renewal and rebirth is upon us. Like a newborn baby, this season brings with it the sweetness of new beginnings and endless possibilities. We have so much to look forward to this season...from not worrying about being cold and packing our blankets away...to knowing that our vegetables will grow again and that our children can play amongst the new plants blossoming to all self-help projects growing from strength to strength. Let us enjoy the endless possibilities that lie ahead this season.

With regards

Welcome to the Sisterhood
